INSTRUMENTS AND EXPERIMENTAL TECHNIQUES
Volume 20, Numbers 1-5, 1977

(A translation of Pribory i Tekhnika Éksperimenta)

Volume 20, Number 1, Part 1 January-February, 1977

	Engl./Russ.
Nonfilm Television Method of Measuring Coordinates of High-Speed Processes (Survey) – A. V. Petrakov	1 7
NUCLEAR EXPERIMENTAL TECHNIQUES	
Passive Filter for Annular Electromagnet of IHEP Accelerator – B. V. Kaz'min, L. L. Moizhes, É. V. Polyakov, O. N. Radin, and Yu. A. Fedorov	13 17
Shaping of Highly Stable Flat Top in Pulse of Excitation Current of Electromagnet in "Sirius" Synchrotron – P. P. Krasnonosen'kikh, V. M. Kuznetsov, N. A. Lashuk, L. I. Minenko, and Z. Sh. Faskhutdinov	17 20
Surface-Ionization Ion Source for Mass Separator Operating on a Heavy-Ion Beam – D. D. Bogdanov, I. Voborzhil, A. V. Dem'yanov, V. A. Karnaukhov, and L. A. Petrov	19 22
System for Changing Anode Foil in a Pulse Électron Accelerator – E. I. Baranchikov, V. D. Korolev, and V. P. Smirnov	22 24
Operation of Wire Spark Chambers in Extreme Conditions – V. A. Viktorov, V. A. Kachanov, A. A. Lednev, G. P. Makarov, Yu. D. Prokoshkin, A. N. Prokhorov, V. A. Sergeev, Yu. N. Simonov, and V. P. Sugonyaev	24 26
Proportional Wire Chambers in High-Intensity Particle Beams – A. N. Inyakin, V. A. Kachanov, P. P. Kostromin, D. I. Patalakha, and Yu. D. Prokoshkin	27 29
Pulse Transformer-Based High-Voltage System of a Streamer Chamber – Ya. V. Grishkevich, G. Peter, D. Poze, Kh. Ruger, K. Trützschler, and A. Schwind	30 31
Filling Streamer Chambers by the Scavenging Technique – A. T. Matyushin, V. T. Matyushin, Zh. Zh. Musul'manbekov, and N. N. Nugrozhin	34 35
Characteristics of 1.5× 1 m^2 Drift Chamber – V. M. Golovatyuk, Yu. V. Zanevskii, B. K. Kuryatnikov, and V. D. Peshekhonov	38 38
Method of Determining Local Flux Density of Fast Monochromatic Neutrons – L. I. Klochkova and B. S. Kovrigin	41 40
Possible Use of Wall Traps and Magnetic Traps of Ultra-Cold Neutrons for Measuring the Lifetime of the Free Neutron – Yu. Yu. Kosvintsev, Yu. A. Kushnir, V. I. Morozov, and G. I. Terekhov	43 42
n-Si, Sn Surface-Barrier Detectors – I. I. Tikhov and B. B. Kovacheva	46 44
Subnanosecond Silicon Detector – Z. A. Al'bikov, A. S. Kondrat'ev, V. I. Petrov, Yu. Ya. Tel'nov, P. B. Khlobystii, and I. I. Shtogrin	47 45

	Engl.	Russ.
Efficiency of Alpha-Radiation Recording by Means of Plastic Scintillation Granules – V. M. Ékkerman, T. N. Seredenko, and V. M. Solomonov	50	47
Investigation of Time Characteristics of Commercial Coaxial Large-Volume Ge(Li)-Detectors – A. E. Banifatov, G. N. Zorin, B. M. Sabirov, V. A. Skakodub, A. D. Sokolov, Kh.-G. Ortlepp, R. S. Reznikov, and G. M. Shcherbakov	53	50
Light Output of CsI(Tl) Thin-Film Detectors – V. F. Levchenko, T. Sartbaev, and G. P. Skrebtsov	56	52
Supplying 58AVP Photomultipliers in Spectrometric Channels of Cerenkov Counters – D. Kollar, L. Kollarova, and M. F. Shabashov	57	53
Investigation of the Sensitivity of Photomultipliers to Gamma Quanta – O. V. Kozlov and I. M. Egelev	61	56
Instrument for Automatic Evaluation of Ionization Measurements Made with Multi-Layer Detectors – G. L. Bashindzhagyan, V. V. Pronin, and N. B. Sinev	65	59
CdS+Cu Dosimeter for Measuring Gamma Radiation, Having High Radiation Resistance – A. P. Galushka, V. T. Mak, and Yu. I. Zaslavskii	68	62
CHRONICLES		
Conference on Proton Linear Accelerators, Chalk River, Canada (Review of Papers) – N. V. Lazarev	70	64
APPLICATIONS OF COMPUTER ENGINEERING IN EXPERIMENTATION		
Exchange Apparatus in PA-BÉSM-4 System for Analysis of Chamber Photographs – M. A. Tashimov and E. V. Lobanov	77	71
Display for Data Output in Physical Experiments – V. M. Aul'chenko, Yu. V. Korshunov, and G. G. Melekhov	78	72
Computer-Controlled Digital Synthesizer of Intervals – V. I. Ivanov and I. A. Malevich	81	75
Wide-Range High-Resolution Time-to-Number Converter – V. M. Aul'chenko	86	79
Quadruple CAMAC Universal Timer – S. G. Basiladze and A. N. Parfenov	91	83
Analog-to-Digital Converters – N. M. Gromoglasov, S. L. Sud'in, and L. I. Sud'ina	96	87
CAMAC Standard 169-MHz Decade Counter with Digital Readout – S. G. Basiladze, Kim Yu Zem, and A. P. Kryachko	99	90
ELECTRONICS AND RADIO ENGINEERING		
120-MHz Decade Counter Using 2TK291 Integrated Circuits – A. M. Koptyakov and V. L. Sorokin	104	95
High-Precision Time Discriminator – A. D. Bordus	105	96
Time Discriminator – B. P. Sabanin	108	98
AL304 Luminous-Diode Digital Indicator in Microcircuit Time-Counting Devices – S. G. Zaluzhnyi	111	100
Counter for Digital Phasemeter with Indicator Using Seven-Segment Luminescent Vacuum Lamps – V. B. Babanin, V. I. Musonov, and V. A. Chizhikov	114	103
Frequency Difference and Ratio Meters Using Thyristors – V. N. Kul'gavchuk	117	105
Voltage–Frequency Converter – N. I. L'yanova	120	108
Voltage–Frequency Converter – S. G. Saligov and D. I. Damirov	122	110

Engl./Russ.

Control Circuits Using Diode Switches – D. Kollar, L. Kollarova, P. Luptak, V. Shtrait, and P. Khorvat 125 113
Intermittency Coefficient Measurement Circuit – A. D. Tishchenko, A. A. Zori, G. D. Fesivskii, N. T. Kireev, V. Z. Karchikyan, and G. M. Agafonov 127 115
Generator of Current Pulses with Sharp Leading Edge – Yu. V. Makritskii 130 118
Two-Channel Nanosecond Pulse Generator – V. Z. Lubyanyi, V. K. Kamuz, and V. E. Sul'zhik 132 120
Design of Water Spark Gaps and Their Commutation Characteristics – N. K.Kapishnikov, V. M. Muratov, and V. Yu. Ushakov 134 122
Transistor Generator of Square Pulses for Image-Converter Shutter Control – S. V. Kusurgashev 137 124
Linear Pulse Selector for Ultrasound Investigations – Yu. D. Samokhin, L. T. Tsymbal, and T. F. Butenko 140 127
Excitation of Ultrasonic Pulses in Solids – K. O. Boltar and G. D. Mansfel'd 142 128
Pulse Frequency Discriminator – D. M. Vernik, B. S. Sedykh, and Yu. M. Kiselev 144 130
Time Characteristics of Output of LI-214 Superorthicon – V. V. Kudryashov, A. S. Kazakov, A. S. Makunin, V. P. Malyutin, I.N.Matveev, and B. V. Poletaev 147 132
Transistorized Frequency Divider of Microwave Pulses – Yu. S. Pavlov and S. I. Sharamentov 149 134
Photoelectric Amplifier for Wide Range of Pulsed Signals – G. A. Aver'yanov, B. M. Savichev, Yu. V. Pleshanov, V. S. Proshina, and S. L. Chigaleichik 152 136
Shaper Amplifier for Proportional Chambers – A. V. Vishnevskii, A. V. Zarubin, and E. A. Silaev 154 138
Fast Amplifier with High Load Capacity – E. A. Meleshko and A. G. Morozov 157 141

Volume 20, Number 1, Part 2 January-February, 1977

Wideband Transistorized Power Amplifier of the Microwave Band – D. A. Kalinikos 161 143
Broadband Logarithmic Amplifier – V. P. Golovkov, A. I. Golyshev, Yu. V. Zubritskii, and S. S. Shikhmanov 162 144
Differential Two-Channel Operational Amplifier – S. L. Sud'in and V. T. Timofeev 165 146
Electrometer Amplifier with Automatic Range Switching – V. G. Kozlov, K. I. Guseva, N. I. Mikheeva, and V. A. Notkin 168 149
Controlled Optoelectronic Divider of Alternating Voltage – V. P. D'yakonov 171 152
Use of Nonlinear Operational Amplifier for Determining Extremal Values of Voltages and Their Functions – V. I. Voronin 173 153
Phase Shifter for Synchronous Detector – I. D. Borinets, I. Ya. Kozyr', and V. N. Fedorov 176 156
Microcircuit Wide-Band Discrimination of Zero Beats – V. N. Ptitsyn 177 157

	Engl.	Russ.
Phase Automatic Frequency Trimming Circuit – V. B. Volkonskii and V. V. Yakovlev	180	159
Apparatus for Investigating Electrooptical Properties of Crystals at Submillimeter Wavelengths – V. N. Apletalin, V. V. Meriakri, and V. A. Shirokov	182	161
Digital Integrator for Chemiluminescent Analysis – V. A. Demin and A. F. Nechaev	184	162
Differential Image Discriminator – A. N. Korol'	185	164
Very Stable Crystal Oscillators Aging Less than 10^{-10} per Month – A. G. Smagin	188	166
High-Voltage Source of Reference Voltage for Supplying an X-Ray Electron Spectrometer – S. M. Mikhailov	190	168
Thyristor Voltage Stabilizer with Pulse-Width Modulation – A. S. Gribakin	192	169
Semiconductor Devices for Control and Stabilization of Currents of Motor Generators – S. T. Latushkin, V. A. Rezvov, and L. I. Yudin	194	171
GENERAL EXPERIMENTAL TECHNIQUES		
Titanium Sorption Pump for a Molecular Beam Detector – V. M. Akimov, A. I. Volkov, and L. Yu. Rusin	198	174
Evacuation of Hydrogen by an Electric Arc Unit with an Output of 25 m^3/sec – L. P. Sablev, E. G. Gol'diner, Yu. I. Dolotov, L. I. Get'man, and R. I. Stupak	201	176
Metallic Superhigh-Vacuum Apparatus for Photoelectric Measurements in the $h\nu \leq 10.9$-eV Region – V. K. Adamchuk, S. I. Fedoseenko, and V. M. Aleksandrov	203	178
Improvement of the Metal Vaporization Rate in Vaporizers with Water-Cooled Crucibles – M. I. Vinogradov, V. F. Ul'yanov, V. G. Dokukin, and A. I. Tarasov	205	179
Device for Investigating Phase Transition Dynamics in Thin Film Condensation – O. I. Vasin, V. I. Petrosyan, S. I. Stenin, P. A. Skripkina, L. V. P'yankova, and A. A. Kroshkov	207	181
Heavy-Current Nanosecond Pulse Electron and Bremsstrahlung Generator – A. P. Gridasov, K. F. Zelenskii, N. V. Kamyshov, N. K. Plekhov, A. I. Sazanov, I. A. Troshkin, and V. A. Tsukerman	210	184
Semiself-Maintained Discharge Device with Ionizing Beam Regeneration – L. P. Fominskii	213	186
Miniature Low-Energy Photoelectron Analyzer – A. I. Dolgin and V. I. Il'in	215	188
Low-Power High-Voltage Devices for Supplying X-Ray Equipment – A. G. Lyapin and Yu. N. Semenov	218	190
Increasing Linearity Range of Light Characteristics of a Photomultiplier by Strobing – I. D. Mitsenko, B. V. Galun, and V. M. Lapushkov	221	193
Influence of Illumination Spectrum of the Single-Electron Peak of an FÉU-39A Photomultiplier – S. S. Vetokhin	223	194
Intrinsic Background of Quadrupole Mass Spectrometers – A. A. Sysoev, I. M. Islamov, and R. S. Khafizov	226	197
Multichannel Ion Source – V. A. Ilyushkin, D. A. Noskov, A. S. Shangin, and Yu. A. Shibaev	228	199
Controlling Duration of CO_2 Laser Radiation – V. M. Borisov, Yu. A. Satov, and V. V. Sudakov	230	201

	Engl.	Russ
Characteristics of a Gas-Discharge Source of Nanosecond Light Pulses – L. P. Babich, T. V. Loiko, and L. V. Tarasova	233	203
Electrodynamic Generation of High-Power Microsecond Light Pulses – G. I. Belogolovtsev	235	205
Photoelectron Apparatus for Investigation of Angular Fluctuations of Optical Radiation – S. E. Sebko, V. P. Klimashin, and I. N. Matveev	238	207
Investigation of Induced Birefringence with a Rotating Polarization Element – V. S. Chudakov	241	210
Automatic Ellipsometer with Linear Two-Coordinate Scanning – G. I. Utkin	244	213
Determination of the Resolution of Luminescent Screens with Thermal Quenching – M. Ya. Varshavskii, L. Yu. Zysina, V. M. Klyuchnikov, and E. I. Tsarapaeva	248	216
Apparatus to Measure Noise Power Spectrum Density of Photodetectors – V. B. Piskunov, K. M. Kulikov, and V. I. Stafeev	250	218
Sighting Devices for Producing a Color Image of a Transparent Inhomogeneous Medium – G. D. Salamandra and N. M. Wentzel'	252	220
Nuclear-Magnetic-Resonance Magnetic-Induction Meter for Calibrating Solenoids Having a Nonuniform Field – E. N. Lysenko	254	222
Chamber for Research in Wide Pressure and Temperature Intervals – P. I. Polyakov and V. G. Synkov	256	223
Method of Optical Investigations under Pressure with a Detector in the Hydrostatic Pressure Zone – M. I. Eremets, Yu. V. Kosichkin, N. P. Kulikova, and A. M. Shirokov	258	225
Polarized Light Method of Investigation under Hydrostatic Pressure – M. I. Eremets, Yu. V. Kosichkin, and A. M. Shirokov	260	227
Low-Temperature Mechanical Press for Studying the Mössbauer Effect – H. Wenzel, A. Kh. Sherif, A. A. Opalenko, and R. N. Kuz'min	262	228
Measurement of Transitions to the Superconducting State under High Pressure by the Contactless Method – E. M. Dizhur and E. S. Itskevich	265	230
Measurement of Small Mechanical Vibrations by a Capacitive Transducer with a Superconducting Resonator – V. B. Braginskii, V. I. Panov, V. G. Petnikov, and V. D. Popel'nyuk	269	234
Diffractometer for Analysis and Correction of Electron-Microscope Images – E. V. Ageev, I. F. Anaskin, and P. A. Stoyanov	272	236
Apparatus for Investigating the Photoconductivity of Semiconductors with UHF Biasing – Yu. E. Gordienko, Yu. A. Dudkin, and B. G. Borodin	276	239
Simultaneous Measurement of Contact Potential and Conductivity of a Semiconductor – A. N. Kalinin and B. I. Bednyi	279	242
LABORATORY TECHNIQUES		
Ultrasonic Laboratory Disperser – B. A. Agranat, I. P. Golyamina, M. B. Samoilenko, and N. N. Khavskii	281	244
Spring Valve Type VV-2500 – P. A. Mitirev and V. M. Chernyshov	285	247
Vacuum Extraction System with Low Background – G. S. Anufriev, V. N. Gartmanov, B. A. Mamyrin, and V. P. Pavlov	286	248

	Engl.	Russ.
Preparation of Thick Targets of Chromium Isotopes – V. N. Medyanik and G. V. Shula	289	250
Growth of Single Crystals of Substances Having High-Temperature Phase Transformation – M. V. Gartman and A. N. Izotov	290	251
Unit for Electron-Beam Cutting of Semiconductor Plates – A. N. Komov, A. I. Kolpakov, and B. D. Rafaevich	293	253
Time Required for Obtaining Stationary Magnetic Field Configuration in Apparatus for Magnetic Reversal – V. V. Golubkov, O. S. Kolotov, T. Sh. Musaev, V. I. Petrov, and V. A. Pogozhev	296	256
Cell for Simultaneous Measurement of Electric Conductivity and Thermo- EMF of Dissociated Compounds – A. V. Ditman and I. N. Kulikova	299	258
Linear Temperature and Temperature Difference Sensor – V. S. Semenov and Yu. É. Artemov	301	260
Method for Construction of Miniature Thermocouples with Variable Cross-Section Electrodes – A. K. Fedyukovich, and Yu. V. Vidin	302	261
Widerange Carbon Thermometers for Low Temperatures – S. F. Vorfolomeev, L. A. Pekal'n, B. I. Al'shin, G. S. Abilov, L. B. Belyanskii, T. S. Pan'kiv, G. A. Kytin, and D. N. Astrov	304	262
High-Pressure String Viscometer with Wide Working Temperature Range – A. I. Karnus, V. P. Slyusar', N. S. Rudenko, and É. I. Vinokurov	307	265
INSTRUMENT DESCRIPTIONS		
Device for Noise-Spectrum Evaluation for Radiation Detectors Based on an FSP-80 Analyzer – V. P. Korotkov, V. V. Losev, and G. G. Pitkevich	309	267
Two-Channel Cryostat for Use with UR-20 Spectrophotometer – N. S. Zhdanovich, Yu. I. Kozlov, and E. A. Rodkin	312	270
Ion Source for MI-1309 Mass Spectrometer for Use in High-Temperature Thermodynamic Studies – A. A. Petrov, E. K. Kazenas, and A. N. Chadin	313	271
Ion-Beam Adjustment in the MSKh-4 Mass Spectrometer – A. I. Busygin, A. A. Nevzorov, and B. Sh. Ul'masbaev	315	273
Electron Gun from an RINA-3D X-Ray Unit for Electron-Beam Excitation of a Compressed Gas – Yu. I. Dymshits, V. A. Korobitsyn, and V. G. Neverov	316	274
Low-Temperature Attachment for Use with DRON and URS-50 Spectrometers – E. V. Filatova and A. O. Filatov	318	275
VM-2 Vacuum Monochromator for the Range 40-700 nm – N. G. Gerasimova, V. G. Bogdanov, and A. V. Kravchenko	320	277
NEW INSTRUMENTS		
Selector-Type Time-Interval Analyzer with a Measurement Range of 10^{-10} to 10^{-2} sec – V. V. Danilevich, A. F. Chernyavskii, and A. K. Yakushev	326	282
Milliammeter with Statistical Elements and a Decatron Light-Spot Display Feature – M. I. Belyi, S. L. Shpadi, and V. P. Sherstnev	328	283
F136 DC Microvolt Nanoammeter – A. M. Eliseev and A. N. Tkachenko	329	284

IT-100 Stabilized Current Source – I. A. Kulik, V. I. Kurochkin, V. A. Marapulets, L. G. Oranskii, and V. P. Starodubov 330 284
Automated Machine for Growing of Single-Crystal Films of Ferrite Garnets – V. L. Vasil'chuk, A. P. Voronov, O. M. Konovalov, M. B. Kosmyna, V. I. Kosmenko, V. S. Osovin, V. M. Puzikov, and V. S. Suzdal' 331 285
Fast-Cooling Microrefrigerator – V. A. Naer and A. D. Solomyanikov 332 286
UT-31MTs Pulsed Ultrasonic Thickness Gauge – M. V. Korolev, V. V. Aristov, and V. V. Uryvaev 333 286
Television Analyzer for the Structure of Materials – M. G. Lozinskii, L. I. Skorobogat, and L. G. Podobeda 334 287
Infrared Radiation Pyrometer for Remote Temperature Measurements of Subassemblies and Components of High-Power Radiogenerating Equipment – G. N. Tsekhanskii 335 287

Volume 20, Number 2, Part 1 March-April, 1977

Obtaining Heavy Current Electron Beams (Survey) – V. P. Smirnov 337 7

NUCLEAR EXPERIMENTAL TECHNIQUES

Active Filter of Annular Electromagnet of HEPI Accelerator – V. K. Vorob'ev and L. L. Moizhes 365 32
Increasing Electron Beam Power by Inductive Accumulator – P. I. Blinov, G. I. Dolgachev, and D. N. Lin 368 35
Neutron Stripping Channel of the High-Energy Laboratory in the Joint Institute for Nuclear Research – A. P. Gasparyan, L. P. Zinov'ev, A. P. Ierusalimov, F. Kotorobai, A. G. Kochurov, V. I. Moroz, S. S. Nagdasev, A. V. Nikitin, Yu. V. Smirnov, and Yu. A. Troyan 371 37
Vekton-1 Double-Arm Spectrometer for ρ^- Photomeson Production – M. V. Anokhin, A. R. Kanetsyan, V. M. Kukarev, É. R. Markaryan, N. I. Nikitin, V. M. Kharitonov, S. G. Arakelyan, Zh. B. Grigoryan, I. A. Keropyan, M. V. Melkumyants, I. S. Amirkhanova, S. S. Arutyunyan, E. M. Boyakhchyan, and E. N. Shcherbakova 376 42
Expanded Setup for Recording Horizontal Air Showers – V. D. Volovik, I. I. Zalyubovskii, A. T. Kaminskii, and V. M. Kartashev 379 45
Recording Rare Nuclear Fission Events in Thin Layers of Plastic by the Matching Method – O. Otgonsurén, V. P. Perelygin, and S. G. Stetsenko 383 49
Making Allowance for Background in Gamma-Resonance Phase Analysis by Means of Total Resonance Absorption Filter – A. V. Dolenko, B. G. Egiazarov, V. P. Korneev, A. A. Melik'yan, and A. I. Shamov 386 52
Proportional Counter for Scattered γ-Radiation Measurement in Mössbauer Spectroscopy – N. A. Tomashevskii, O. N. Razumov, and Yu. V. Galushko 389 54
Edge Effect in Gas Counters of Slow Neutrons – E. A. Frolov and I. A. Kharitonov 392 56
Measuring Gamma-Radiation Dose Rate by Means of a Silicon Detector with a p–i–n Junction in the Pulse-Count Mode – V. S. Gorev, V. A. Kozhemyakin, and M. D. Firsov 394 58
Use of Commercial Semiconductor Diodes as γ-Radiation Detectors – V. V. Pevtsov 398 63
Scintillation Detection Units with CsI(Tl) Crystals and Reference Alpha-Sources – Yu. A. Surkov, O. P. Sobornov, and I. A. Lebedev 400 65

APPLICATION OF COMPUTER TECHNIQUES IN AUTOMATIC PHYSICAL MEASUREMENTS

Use of MIR-2 Computer in Automatic Physical Measurements – I. M. Breev, S. V. Demin, A. M. Martsinovskii, and V. S. Revenko 405 69

Automatic System of Obtaining and Treating Experimental Data on Nonexponential Nuclear Relaxation – V. P. Zelenin, V. A. Kamenskikh, G. E. Kibrik, A. N. Osipenko, Yu. I. Rozenberg, and G. I. Shaposhnikov 407 71

Automated System for Carrying out Experiments Using Subnanosecond Pulses – V. V. Krylov and D. M. Ponomarev 410 74

Indicator-Setting Operator Terminal – A. Kh. Angelov and V. D. Inkin 413 77

Time Coder with Variable Channel Width – A. G. Balagurov, I. P. Barabash, and V. D. Shibaev 415 79

Fast Analog–Digital Converter of Bitwise Balancing Using Integrated Microcircuits – V. I. Borodatyi, I. R. Turchin, and V. V. Khomtsov 419 82

Accurate Pulse-Width Converter – É. G. Mirzabekyan, R. G. Simonyan, and and A. M. Gevorkyan 421 84

System for Reproducing Pulse-Width Signals from a Magnetic Film – É. G. Mirzabekyan, R. G. Simonyan, and A. M. Gevorkyan 423 86

Digital Readout Unit for Use with Double Interrogation Method – V. M. Kirpichnikov and V. A. Sklyarov 426 89

ELECTRONICS AND RADIO ENGINEERING

Decade Counter with Liquid Crystal Readout – A. A. Eremin and A. V. Vasyanin 429 92

Reversible Counter with Decimal Readout – V. E. Semenov 431 94

Method for Triggering Ring Counters – G. P. Feofilov and S. Sh. Paroder 433 96

Binary-Decimal Code-to-Voltage Converter Using Capacitor Switching – Yu. N. Grekhov 434 97

Frequency-to-Voltage Converter – A. M. Tishenko, A. I. Ovcharenko, V. M. Trokhin, and A. K. Solov'ev 438 101

Shaper-Discriminator for Low-Noise Spectrometers – Yu. N. Markov 440 103

Small-Signal Limiter with an Adjustable Threshold that Uses Photodiodes – B. D. Zabegalov and N. I. Velikanov 442 104

High-Speed Noiseproof Comparators – A. S. Nagaikin 443 106

Hybrid Computing Device for Root Extraction – Yu. V. Troitskii, V. D. Drozdov, and V. N. Khaletskii 447 109

Bipolar Logarithmic Amplifier with Wide Dynamic Range – A. T. Kotov and V. I. Maslyak 449 111

Logarithmic Attenuator – V. S. Egorov 450 112

Analog Voltage Multiplier – Ya. L. Burtov and V. A. Mezinov 451 113

High-Voltage Wide-Band Voltage Divider – B. A. Demidov and M. V. Ivkin 454 115

Switching Wide-Band Power Amplifier Based on Transistors – P. A. Popov and M. D. Sverdlov 456 117

A DC Amplifier Based on a Threshold Device with Feedback – V. A. Klynin 459 119

High-Quality Resonance Filter on Integrating Discretizers – B. V. Chuvykin, V. D. Mikhotin, and T. B. Osipovich 461 121

Active One-Third Octave Microelectronic Filter Using RC-Structures – A. F. Bulbanyuk, E. D. Volkova, M. V. Kozlov, Yu. A. Masyurenko, and A. D. Nizhenskii 464 123

Narrow-Band RC Rejector Filter – G. I. Alekseev 466 125

Excitation Generator for Semiconductor Injection Lasers – A. A. Matsveiko and A. B. Sergeev 468 127

Powerful High-Voltage Nanosecond Pulse Generator – A. A. Avdienko, A. F. Bulushev, B. I. Grishanov, and Yu. G. Matveev 470 129

Plasma Trigatron Spark Gap – V. V. Baraboshkin 472 131

Engl./Russ.

Volume 20, Number 2, Part 2 March-April, 1977

ELECTRONICS AND RADIO ENGINEERING

Multichannel High-Current Pulsed Commutator – R. D. Ziganshin and A. P. Gagarin 475 133

Trigger Shaper for High-Voltage Power Supplies – Yu. V. Kuznetsov, E. V. Lazutin, I. M. Piskarev, V. P. Popov, and V. A. Krushchev 476 134

Field-Strength Meter for Pulsed Electric Fields – É. M. Bazelyan, V. A. Brandenburgskii, and A. Z. Ponizovskii 479 137

Multichannel Recorder for Measuring Current Density Distribution Over Cross Section of Beam from Pulsed Electron Accelerator – V. A. Kochenkov, V. I. Mikhailov, V. S. Naek, A. I. Porukhun, S. L. Skorobogat, and I. N. Slivkov 481 139

Nanosecond Radio-Pulse Reflectometer – A. V. Andrianov, E. I. Bulatov, and Yu. V. Vvedenskii 484 141

High-Resolution NMR Spectrometer for Solid-State Research – L. N. Erofeev, O. D. Vetrov, B. A. Shumm, M. Sh. Isaev, and G. B. Manelis 488 145

Reference-Signal Shaper for Low-Frequency Module of Spectrometer – V. A. Mishin and Yu. D. Samokhin 491 148

Scan-Velocity Transducer for Driven-Sweep Generator – O. M. Sorokin and B. D. Matsoyan 493 149

Achromatic Internal Modulation in Polarizing Submillimeter Fourier-Interferometer – V. I. Lapshin 496 152

Thermophotoindication of Distribution of High Levels of SHF Power Fluxes in Liquid Crystals – V. I. Maksimov and V. A. Chetkarev 498 154

Two-Mode Hybrid Resonator for Study of Nonlinear Effects – R. P. Devyaterikov, V. V. Isaev-Ivanov, V. A. Ryzhov, and V. N. Fomichev 501 157

GENERAL EXPERIMENTAL TECHNIQUES

Unit for Electrically Excited Preionization of Gas with Electron-Beam Recuperation – L. P. Fominskii and É. V. Gorozhankin 504 159

Fast-Acting Vacuum Commutator with Connection by Liquid–Metal Contacts – T. G. Galkina, O. A. Gusev, A. G. Nachaev, and E. P. Pavlov 506 161

High-Yield Laser Ion Source with Plasma Focusing for Mass-Spectrometric Analysis of Solids – Yu. A. Bykovskii, L. M. Babenkov, T. A. Basova, V. I. Belousov, V. M. Gladskoi, V. V. Gorshkov, V. G. Degtyarev, I. D. Laptev, and V. N. Nevolin 508 163

Determination of Isotopic Composition of Elements in Microvolumes of a Solid – M. Sh. Kaviladze, T. A. Melashvili, and M. S. Kviriya 512 166

Automatic Instrument for Recording Secondary-Electron Emission Coefficient of Metallic Materials – E. M. Savitskii, I. V. Burov, and V. I. Kapustin 515 169

High-Current Photomultiplier with Disk-Type Electrode Leads – A. G. Berkovskii, A. I. Veretennikov, Yu. I. Gubanov, V. G. Gusel'nikov, A. N. Sushchenko, and O. T. Chernyakova 518 172

Photomultiplier-Modulating Circuit with Spurious-Signal Compensation – N. A. Koshilev, V. L. Masalov, N. A. Strokin, and A. A. Shishko 521 174

Some Characteristics of Photomultiplier with GaP First Dynode in Chemiluminescence Counters – I. R. Aleksandrov, N. V. Dunaevskaya, O. I. Ivanov, I. M. Karnaurkh, A. A. Ostapenko, S. M. Pel'tek, and G. B. Stuchinskii 523 176

Illumination Characteristics of Dissector Operating in One-Electron and Current Modes – I. V. Reznikov 525 178

Characteristics of BÉU-6 Channel Electron Multipliers in Detection of Neutral Particles – M. A. Gruntman and A. P. Kalinin 528 180

Compact HCN Laser – D. N. Yundev 530 182

	Engl.	Russ.
Optical Module Based on Injection Semiconductor Laser Connected to a Light Guide – B. V. Alyab'ev and A. A. Matsveiko	533	185
Parameters of a Conical Fiber Optics Quantum Amplifier (OQA) – V. P. Konarev, I. N. Matveev, and Yu. V. Trubetskoi	535	187
Measurement of Frequency Characteristics of a Doppler Broadened Laser Amplification Line – M. V. Danileiko, T. V. Rozhdestvenskaya, and V. P. Fedin	537	189
Interferometer with Improved Compensation for Phase Distortion in the Light Divider – A. A. Balashov, V. S. Bukreev, V. A. Vagin, and G. N. Zhizhin	539	191
Holographic Method of Measuring Phase Distortions of an Interference Pattern Owing to the Transient Nature of Laser Generation – I. P. Nalimov and G. N. Kolobrodov	542	193
Method of Increasing Accuracy in Determining Position of Interference Fringes – M. O. Chaika and Yu. G. Kozlov	544	195
Maximum Number of Particles that Can Be Recorded by Holography – A. P. D'yachkov	546	197
Production of Stationary Strong Magnetic Fields Using Windings with Constant Current Density – Yu. K. Katrukhin, N. G. Kocharov, and A. P. Doroshenko	548	199
Use of a Terbium Single Crystal to Concentrate Magnetic Flux in Superconducting Solenoids – S. A. Nikitin, G. I. Kataev, V. P. Posyado, and G. E. Chuprikov	550	201
High Pressure System for Nuclear Magnetic Resonance Spin–Echo Apparatus – A. P. Arkhipov, N. K. Gaisin, and F. M. Samigullin	552	203
Apparatus for Applying a Strong Uniaxial Compression to Single-Crystal Samples at Low Temperatures – N. B. Brandt, V. F. Keptya, V. A. Kul'bachinskii, and N. Ya. Minina	555	205
Calculating Dynamic Error of Crusher Method – A. V. Klimov	558	208
Dynamic Volt-Capacitance Characteristic Measurement in Metal-Oxide-Semiconductor Structures – M. K. Samokhvalov, V. V. Novichkov, and A. M. Sverdlova	559	209
LABORATORY TECHNIQUE		
Manipulator for Measurement of Contact Potential Difference by the Kelvin Method – V. L. Korotkikh, A. D. Korinfskii, and A. L. Musatov	562	211
High-Speed Vacuum Rotational Tap – A. V. Belorusov and A. I. Karchevskii	564	213
Vacuum Sluice-Gate Loading Devices – V. E. Minaichev, V. V. Odinokov, and V. V. Savin	567	215
Filamentary Silicon Piezoresistor for Measurement of Pulsed Processes – G. A. Abramchuk, V. A. Alekhin, and V. G. Dergacheva	569	217
Device for Scanning a Laser Beam at a Fixed Frequency – I. L. Kuznetsov, Yu. M. Bukker, and L. B. Sokolova	571	219
Unit for Automatic Spectrometer Control in Discrete Recording of Spectra – V. V. Kol'tsov and M. N. Ardasenov	572	220
Fiber-Optics Connectors – B. V. Alyab'ev and A. B. Sergeev	573	221
Determination of Radial Refractive Index Profile of Fiber Lightguides – V. V. Grigor'yants, M. E. Zhabotinskii, G. A. Ivanov, A. V. Frantsesson, and S. V. Shreiber	575	222
Measurement of Surface Color Temperature – G. D. Ivlev, Yu. F. Morgun, and V. N. Chizhevskii	577	224
Tunnel Diodes for Pressure Measurements – N. P. Krivorotov, A. P. Vyatkin, and S. S. Shchegol'	579	226
Miniaturized Pressure-to-Frequency Converter with Pulse Output – V. I. Kuznetsov, V. V. Meer, F. Z. Rozenfel'd, and A. V. Tarakanov	582	228
Apparatus for Cooling Photomultipliers by Means of Semiconductor Microrefrigerators – V. S. Babaev, A. G. Zhiglinskii and E. S. Fedurkin	584	230
High-Temperature Centrifuge – V. M. Stebakov and E. N. Yurkov, E. V. Vasil'ev, and L. S. Tyan	585	231

Multiposition Metallic Reactor for Liberation of Noble Gases – B. A. Mamyrin and L. V. Khabarin 586 232

REVIEWS OF INSTRUMENTS

Attachment to the B5-8 Voltage Stabilizer – A. T. Sokolov 588 234

Electronic Circuit for Wavelength Scale Markers in Automatic Recording of Luminescence Spectra by the SPM-2 Monochromator – A. V. Zubakov and I. E. Puzin 589 235

Coupling RÉ-1301 EPR Radiospectrometer with "Diapazon" Temperature Variator – V. S. Tverskoi, A. S. Kotosonov, and N. I. Sidorov 591 236

Circulation Cooling System Based on the G-3 Serially Produced Helium Liquefaction Apparatus – L. V. Dinaburg, V. F. Fokeev, and G. Ya. Shelgunov 592 238

Extending the Measurement Range of Fluxmeter Type M19 – V. M. Novikov and P. I. Pomasheva 594 240

NEW INSTRUMENTS

Instrument Type Kristall-1 for Automatically Measuring the Fusion Temperature of Crystalline Samples – S. V. Buryukov, S. V. Drozdov, and V. P. Markin 596 241

High-Speed Pulse Generator with an Amplitude of 1 MV – I. K. Zhankov and A. I. Nalepov 597 242

High-Speed Generator of Nanosecond Pulses at an Amplitude of 500 kV – I. K. Zhankov, V. M. Kuznetsov, and A. I. Nalepov 598 243

Generator of Current Pulses – Yu. V. Makritskii 599 244

Miniature Current Pulse Program Generator – A. Ya. Konovalov, N. L. Fedorenko, and N. A. Ryabinin 599 244

Signal Generator for Adjusting and Calibrating Time Measurement Systems – V. V. Danilevich, V. G. Kvachenok, M. A. Priimak, A. F. Chernyavskii, and A. K. Yakushev 600 245

Gas-Discharge Light-Pulse Source Type IGIS-3 – L. Yu. Abramovich, V. A. Gomzin, and V. I. Eremin 601 246

Miniature Power Pack for Solid-State Lasers Type SAP-M – I. M. Divil'kovskii, D. V. Kovalevskii, A. A. Matsveiko, and L. K. Subbomin 602 247

Noise Characteristic Meter – M. A. Shampilo, V. S. Pekurov, V. F. Zharkov, and V. A. Zaika 603 248

Semiconductor Meter for Small Currents – M. A. Shampilo, L. V. Babichev, L. D. Babutskaya, V. P. Mel'nikov, and P. G. Sopin 603 248

Random-Process Spectrum Analyzer – A. V. Blokhin, M. I. Kolodin, Yu. I. Rebrin, V. A. Romanov, and V. P. Shabashov 604 249

Convertor of Normal (Gaussian) Noise in Processes with Maximum Entropy – Yu. K. Kazakov and A. N. Morgunov 605 249

Input Equipment for Feeding Continuous Signals into an Electronic Computer – B. E. Aksenov, V. M. Krylov, and A. I. Chernen'kii 605 250

Adapter for Tape Punches Types IL-80 and IL-150 – O. S. Maksimov 606 250

Specialized Pulse Amplitude Analyzer for the Quant-Type Aerosol Classifier – V. V. Alekseev, V. N. Kazakov, S. O. Murumyants, T. K. Nezhmetdinov, V. N. Ushakov, V. L. Filippov, and L. S. Semenov 607 251

Photographic Camera for Scanning Oscillograms of Multipulse Lightning Discharges in Time – F. L. Khydyrov 608 251

Instrument for Measuring the Attenuation in Optical Fibers and Fiber Lightguides – L. S. Gol'dfarb, V. I. Zagorel'skii, A. B. Tsibulya, and V. G. Chertov 609 252

Apparatus Equipped with X-Ray Tube Type ARTVA-5.0 with Rotating Anode 610 253

Automatic Equipment with Digital Output for Determining Thermodynamic Enthalpy and Mean Specific Heat of Materials – A. I. Fesenko, Yu. P. Menchev, and V. S. Borisyuk 610 253

Instrument for Contactless Measurement of Surface Temperatures – V. B. Nikulin and E. S. Avdoshin 611 254

Engl./Russ.

Thermoelectric Microthermostat for Emitters – V. A. Naer, V. N. Taran, I. Ya. Khirich, and P. P. Antonov 612 254
Precision Resistors 613 255

Volume 20, Number 3, Part 1 May-June, 1977

Generation of Reference Oscillation in Statistical Analysis of Phase Fluctuations (Review) – Yu. M. Veshkurtsev 615 7
Methods of Eliminating Overlapping Pulses (Review) – M. E. Glushkovskii 622 13

NUCLEAR EXPERIMENTAL TECHNIQUES

Deflecting Septum Magnet – Yu. A. Bashmakov, K. A. Belovintsev, V. A. Karpov, V. E. Pisarev, and K. N. Shorin 630 21
Miniature Pulse Deflector – A. A. Mikhailichenko and V. F. Turkin 632 23
Pulsed Power Supply System to Betatron Electromagnet – V. V. Vasil'ev and É. G. Furman 634 24
Apparatus for Measuring Pulse-Amplitude Instability in Accelerator Systems – L. P. Butenko, V. V. Mel'nichenko, and A. N. Savchenko 636 26
Automated System of Measuring Magnetic Field of an Isochronous Cyclotron – Yu. P. Buzulukov, N. I. Venikov, A. A. Vinogradov, I. V. Naumov, V. V. Paramonov, E. M. Khodakov, I. M. Shapkin, and V. E. Yarosh. 638 28
Three-Electrode Pulsed Electron Gun on a Current of up to 250 A – Yu. V. Grigor'ev and L. P. Shanturin 642 32
Plasma Beam Ion Source – V. A. Saenko, A. I. Vladimirov, and Yu. P. Tret'yakov 645 34
Miniature Source of Slow Protons for Studying Efficiency of Their Focusing – L. R. Voitsik and B. G. Erozolimskii 649 38
Method of Studying Changes in Structure of Thin Samples – V. K. Gorshkov, L. N. L'vov, and V. D. Kalantarov 652 40
Measuring Neutron Absorption Cross Sections – E. A. Pavlenko and N. L. Gnidak 653 42
Lamb Shift Polarimeter of Slow-Proton Beams – Yu. A. Plis and L. M. Soroko 656 44
Double Mössbauer Spectrometer for Measuring Small Resonance-Line Shifts – N. N. Delyagin, Yu. D. Zonnenberg, V. I. Nesterov, and S. A. Sergeev 660 48
Interpolation of Response Function of Gamma-Ray Spectrometers by Splines – N. G. Volkov, V. I. Dorogov, and Yu. I. Malakhov 663 50
Scintillation Time-of-Flight Telescope for Cosmic-Ray Studies – V. G. Bondarenko, V. A. Grigor'ev, E. F. Maklyaev, and M. F. Runtso. 666 53
Inhomogeneity in Light Collection in Large Scintillation Counter – A. N. Alent'ev and I. G. Shibaev. 669 55
Automated Correlation Spectrometer with Two Ge(Li) Detectors – B. A. Alikov, M. Budzynski, J. Wawryszczuk, K. Ya. Gromov, R. Ion-Michai, E. Krupa, G. I. Luzurei, M. M. Malikov, T. M. Muminov, V. I. Stegailov, V. Tanska-Krupa, V. I. Fominykh, M. I. Fominykh, I. Kholbaev, and V. M. Tsupko-Sitnikov 672 57
Pulse-Height and Time Analyzer for Nuclear Radiation Semiconductor Detectors – P. A. Votinov, V. K. Eremin, N. B. Strokan, N. I. Tisnek, and A. Sh. Shamagdiev .. 676 61
Multistrip Beta-Particle Semiconductor Detectors for Use with Magnetic Spectrometers – R. A. Muminov, F. U. Kugatova, D. K. Khasanov, and A. Ya. Yafasov 679 64
Radiation-Resistant Fast-Electron Detectors Based on In_2Te_3-Type Semiconductors – V. M. Koshkin, L. P. Gal'chinetskii, V. N. Kulik, G. N. Gusev, and V. R. Gur'ev 681 66
Edge and Radial Dependence of Gas Multiplication Factor in Cylindrical Proportional Counters – Yu. V. Abramov, E. V. Devyataikin, and Yu. Ya. Sokolov 684 68

	Engl./Russ.	
Accelerated Scanning for Families of Gamma Rays in X-Ray Pellicle Stack – Zh. S. Takibaev, A. S. Baigubekov, and T. Kh. Sadykov	686	70
EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING		
Analog-Signal Recording on Magnetic Tape and Deformation Input into the BÉSM-4 Recorder – V. A. Alimov, V. N. Varganov, V. S. Karavanov, A. V. Rakhlin, and Yu. G. Tikhonov	689	73
Position-Balance Analog-Digital Converter Using Large Integrated Circuits – G. G. Bondarovich, N. A. Sokolova, and V. G. Tsyvinskii	692	76
High-Speed Parallel Analog-Digital Converter Using Serial Integrated Circuits – G. D. Bakhtiarov and P. A. Dzardanov	694	78
Pulse-Amplitude to Digital Converter with Large Dynamic Range – N. N. Balamatov, A. A. Sotsilenkov, and Yu. V. Nil'sen	697	80
GTI-742 CAMAC Clock Pulse Generator – Kim U Zem and A. P. Kryachko	699	82
Puncher Attachment for F595KM Transcriber – M. M. Grudinin and P. A. Koval'	702	85
ELECTRONICS AND RADIO ENGINEERING		
Ten-Channel Differential Discriminator – V. S. Mironchik, Yu. A. Panov, and E. Ya. Éns	704	86
Low-Hysteresis Discriminator – E. V. Korol'ko and V. V. Suvorov	706	87
Use of Leading-Edge Discriminators to Reduce Background of Commercial Proportional X-Ray Counters – D. A. Goganov, A. G. Guslina, V. F. Korolev, B. S. Lozinskii, and V. A. Sklyankin	708	89
Converter of Temperature into Pulse Frequency – A. I. Ovcharenko, A. K. Solov'ev, and V. M. Trokhin	709	90
High-Voltage Pulse Generator – V. I. Zametin and V. A. Zazulin	711	91
Powerful Current-Pulse Generator – V. A. Ivanov, V. I. Levchenko, and V. V. Mikhnevich	715	95
Generator Producing Evaporating Pulses for an Atomic Probe – N. V. Nikonenkov and V. B. Lebedev	717	97
Thyristor Generator with Automatic Regulation of Current Pulse Amplitude for Pumping Semiconductor Lasers – B. V. Galun	719	98
Thyristor Generator of Nanosecond Current Pulses – B. V. Galun, I. D. Mitsenko, and V. I. Govorukhin	721	100
Wide-Range Pulse Generator Based on Logic Elements – E. S. Gorbenko and K. S. Kokhnyuk	723	102
Generator of Voltage Pulses for Transverse Discharges – V. N. Ishchenko, V. N. Lisitsyn, and V. N. Starinskii	725	103
Clock-Pulse Generator for Charge-Coupled Devices – N. I. Mishchenko, V. I. Zhizhimov, and Yu. V. Martyshevskii	728	106
Pulse Generator – V. A. Rakhubovskii	730	108
Pulse Modulators with Increased Pulse Repetition Rate – T. E. Anisimova, V. F. Borisov, D. A. Goryachkin, V. M. Gromovenko, V. M. Irtuganov, V. P. Kalinin, Yu. P. Nikonov, and O. I. Pashkov	732	109
Infralow-Frequency Triangular Waveform Voltage Generator – Yu. S. Artamonov	735	112
Quartz-Crystal Stabilized 150-MHz Oscillator – E. Vinkler, V. M. Grebenyuk, and V. G. Zinov	736	113
Waveform Shaper of Long Pulses – L. Ya. Goncharov and T. N. Sevryukova	739	116
Pulse-Position Modulator with Rectangular Symmetric Pulses – M. V. Avakyan and G. G. Antonyan	740	117
Device for Deriving Extrema of Pulsed Bell-Shaped Signals – L. L. Kovalenkov and I. A. Babanov	742	118
Instrument with Automatic Selection of Measurement Range for Recording Waveform of Single-Sweep Signals – S. I. Goryushkin, V. A. Oboshivalov, A. A. Rostovtsev, and Yu. V. Shein	745	121
Wideband Discrete Delay Line – V. I. Sazanov and N. G. Yaremenko	749	125

	Engl.	Russ.
High-Speed Controlled Attenuator – V. E. Yamnyi, Yu. I. Belonosov, and É. I. Podol'nyi	751	127
High Stability Wide-Band Amplifier – Yu. N. Mishin, L. F. Ryabkov, and V. N. Serov	752	128
Wideband Amplifiers with Diode Interstage Coupling – A. S. Nagaikin	754	129
Charge-Sensitive Amplifier with Source-Follower Input – V. S. Gorev, M. D. Firsov, V. V. Kandybin, and N. I. Shatilo	757	132
Electrometric Voltage Amplifier – P.-Yu. P. Zhilinskas and T. L. Lazovskii	759	134
Artificially Cooled Field Effect Transistor Amplifier with 1°K Noise Temperature – L. L. Anan'ev, A. M. Pozharov, and N. V. Egorov	760	135

Volume 20, Number 3, Part 2 May-June, 1977

ELECTRONICS AND RADIO ENGINEERING

	Engl.	Russ.
Two-Channel Correlation Amplifier for Study of Low-Frequency Fluctuation Processes – G. P. Zhigal'skii, A. V. Karev, and A. S. Fedorov	763	137
Low-Frequency Modulation Amplifier – B. M. Shinkevich, V. T. Pokhabov, and A. I. Mordasov	766	139
Analog Multiplier with Frequency Output – L. I. Makeeva and V. V. Makeev	769	142
Frequency Divider Using Integrated Operational Amplifiers – P. A. Popov, R. N. Lependina, and V. I. Kosikov	772	145
Integrating Active Low-Frequency Filter Based on Integrated-Circuit Operational Amplifiers – V. P. D'yakonov, A. G. Kalinenko, and A. A. Maksimchuk	774	146
Quadrature Sinusoidal-Voltage Phase-Shifter at Frequency of 20 Hz-200 kHz – V. I. Kenzin, S. P. Novitskii, and I. I. Burenkov	776	148
Wide-Band Low-Frequency Sinusoidal Voltage Stabilizer – S. P. Novitskii, I. I. Burenkov, and V. I. Kenzin	778	150
Multichannel Electronic Integrator for Magnetic-Probe Measurements with Detection of Signals Masked by Noise – N. P. Ponomarenko and I. E. Tishchenko	780	152
Peak Detector Extremator – Yu. A. Alabuzhev and A. P. Bobrovskii	783	154
Stable Transformer-Type DC Transducer – K. Ya. Volodina, S. V. Kalenov A. V. Klyochkov, B. D. Omel'chenko, and L. I. Yakovenko	785	155
Analog Processor – O. I. Andronov and V. G. Brovchenko	787	157
Instrument Analysis of Effective Width of Random Process Spectrum – A. V. Blokhin and M. I. Kolodin	791	160
Control Unit for Rapid-Scan Spectrometer – Yu. P. Biryukov and O. D. Dmitrievskii	793	162
Superhigh-Frequency Method of Studying Dielectric Properties of Ferroelectrics in the Vicinity of Phase Transition – S. V. Baryshnikov, É. V. Bursian, and N. N. Trunov	796	165
Expansion of Q-Meter Range – Yu. G. Podkin and E. I. Fedingin	799	167
Stable Semiconductor Gigaohmmeter with Controllable Threshold Sensitivity – B. A. Kipnis, L. D. Dunavetskii, I. Ya. Voronetskii, and P. M. Bondarchuk	801	169
Adjustable Current-Supply Stabilizer for Magnetic-Lens Beta Spectrometers – B. A. Alikov, T. M. Muminov, S. I. Ormandzhiev, U. S. Salikhbaev, and R. R. Usmanov	803	170

Engl./Russ.

GENERAL EXPERIMENTAL TECHNIQUE

MI-1305 Spectrometer with an Ion Probe and an Energy Analyzer for Studying Solids – M. A. Vasil'ev, A. D. Krasyuk, and V. T. Cherepin 806 173

Voltage on Electrodes of Spark-Ion Source of a Mass Spectrometer – V. A. Gerasimov and A. I. Saprykin 809 175

Multichannel Ion-Beam Device – V. A. Ilyushkin, D. A. Noskov, A. S. Shangin, and Yu. A. Shibaev 811 177

Investigation of Duoplasmatron as a Source of Argon Ions in an Ion Microanalyzer – V. F. Popov, B. D. Tserpitskii, and A. B. Raitsyn 814 179

Optimization of Selector Parameters for a One-Frequency Tunable One-Pulse Laser – S. A. Mikhnov and V. P. Khyuppenen 817 181

Compact Pulse Generator for Pumping Semiconductor Lasers – B. V. Galun, I. V. Kudryavtseva, and T. P. Shevkunova 820 184

HCN Laser in Three-Mirror Interferometer for IF Phase Measurements – N. I. Malykh, A. G. Nagornyi, and E. S. Yampol'skii 822 186

Two-Beam Recording Spectrophotometer with Compensated 100% Line – N. G. Gerasimova, V. G. Bogdanov, and V. K. Nepoklonov 825 188

Wavelength Modulator for DFS-13 Spectrograph – A. I. Malik and V. B. Baranyuk 829 192

Attachment for Recording Reflection Spectra with SF-8 Spectrophotometer – A. A. Kukharskii 830 193

Apparatus for Measuring Light Scattering in Aqueous Solutions at High Temperatures and Pressures – S. I. Burkovskii 832 194

Field Topography of a Powerful Electromagnet with Supersaturated Polepieces – A. D. Skokov, Yu. I. Krasavin, and I. M. Puzei 834 195

Determining Thermal Inertia Characteristic of a Microthermocouple – M. M. Mal'gun and M. D. Sobolev 836 197

Experimental Instrument for Studying Thermoemission Properties of Metals and Alloys – G. A. Ablisimov, I. F. Divisenko, V. A. Zemlyankin, and M. K. Konin 839 200

Automatic Equipment for Studying Small Nonlinearities in Volt–Ampere Characteristics of a Tunnel Structure – E. V. Kolla 843 203

Measurement by Means of Uncalibrated Transducers with Nonlinear Characteristics – E. P. Krasnoperov 846 206

Facility for Electron Diffraction Investigation of Supersonic Streams Flowing into a Vacuum – E. A. Katrunova, A. P. Voitenko, G. V. Dobrovolskaya, V. I. Yaremenko, and É. T. Verkhovtseva 849 208

Installation for High-Temperature X-Ray–Thermographic Analysis – I. D. Berkhoer, I. N. Eres'ko, V. M. Ol'shanskii V. V. Oryabinskii, and A. G. Kholodnyi 852 210

Recording of X-Ray Spectra with One- and Two-Dimensional Spatial Resolution by Means of a Spherical Crystal Analyzer – L. M. Belyaev, A. B. Gil'varg, Yu. A. Mikhailov, S. A. Pikuz, G. V. Sklizkov, A. Ya. Faenov, and S. I. Fedotov 855 212

Apparatus Based on GUR-5 Goniometer for Measuring Small-Angle X-Ray Scattering – N. P. Matsibora and A. Sh. Goikhman 859 216

Method of Investigating Degree of Crystallinity of Polymer Films – V. G. Zadorozhnyi, A. I. Kostrzhitskii, and E. P. Tikhonenko 862 218

Device for Obtaining Temperatures of 4.2-300°K with Considerable Heat Flow into Specimen – V. I. Silaev, A. I. Belyaeva, and Yu. N. Stel'makhov 864 220

	Engl.	Russ.
Measurement of Low-Temperature Specific Heat of Metals under Pressure – E. S. Itskevich, V. F. Kraidenov, and V. S. Syzranov	866	221
Precision Balance with Radio-Engineering Displacement-Sensing Unit – V. B. Braginskii, V. I. Panov, and V. N. Frontov	871	225
LABORATORY TECHNIQUES		
Integrated-Circuit Commutator for Stepping Motor – V. M. Katsman and A. N. Nikolaev	874	228
Cooled Photoresistance Based on Copper-Doped Electronic Germanium – A. S. Kaminskii, Ya. E. Pokrovskii, and S. V. Poteshin	876	229
High-Temperature Heating of Ion Source of a Mass-Spectrometric Leak Detector – V. E. Stadnik	878	231
Study of Profile of an Ion Beam by Means of a Titanium Tritide Collector – Yu. G. Bessarabskii, S. B. Ovsyannikov, and S. P. Sukhoveev	880	232
High-Voltage Vacuum Input Lead – A. P. Solodovnikov	882	234
Distiller of Alkali Metals – V. P. Gorban', V. Ya. Katchan, and A. V. Kozyukov	884	236
Secondary Radiation Standard in Ultraviolet Region of Spectrum – E. D. Mishchenko, V. A. Makarov, L. P. Shishatskaya, and T. G. Ivanova	886	238
Heated Closed Quartz Cell for Spectroscopic Investigations of Vapors of Metals – I. M. Beterov, A. A. Chernenko, and A. V. Shishaev	888	239
Instrument to Measure Small Deformations on Transparent Bodies – G. A. Andreev, V. S. Vinogradov, I. G. Povolotskaya, and D. M. Uslavtsev	889	240
Photoelectronic Setting for Comparison of Lines on a Photographic Plate – V. I. Kovalev and É. Ya. Kononov	891	241
Automated Comparator–Microphotometer – V. I. Kovalev and É. Ya. Kononov	895	244
Crystallizer for Growing Single Crystals from Solutions with Precision Control of Supersaturation – E. D. Kurtsman and L. Ya. Suvorov	897	245
Preparation of NaCl, KBr, and CsI Crystals 5-30 μ Thick for Channelography – A. A. Abdurazakov, M. Kh. Saied, and V. V. Skvortsov	899	247
Obtaining Defect-Free Surfaces on Single Crystals by Vibratory Polishing – A. N. Grigor'ev, L. I. Nikolaichuk, and L. I. Pivovar	902	249
Thyristor Temperature Regulator for High-Power Heaters – V. T. Vyskub	904	251
Fast-Acting Miniature Microcalorimeter – Yu. F. Red'ko and B. N. Demchuk	905	252
Quartz Thermometer with Oscillator Based on Field-Effect Transistors – N. A. Novinskii, V. M. Zhilkin, and I. I. Evseev	909	255
Glass Helium Cryostat for Optical and Magnetooptical Investigations – R. I. Dzhioev and I. P. Shiryapov	911	256
Cryostat with Continuous Helium Flux for Optical Investigations at a Fixed High Pressure – V. B. Anzin, Yu. V. Kosichkin, Yu. N. Kotlov, and A. I. Nadezhdinskii	912	257
Electrical Inlet into a High-Pressure Chamber – Yu. G. Kovalev, V. G. Khizhnyak, and I. D. Kosobudskii	914	260

Engl./Russ.

NEW INSTRUMENTS

KG21 Gamma-Ray Dosimeter – V. V. Pravotorov and A. I. Filatov 916 261

System for Measuring Parameters of Two-Radiopulse Signals – S. M. Maevskii and A. I. Fendrikov 917 262

Spectral-Correlation Analyzer for Radio Signals – M. M. Baburin, L.-K. E. Bondarenko, V. A. Zhukov, L. P. Konovalova, V. V. Mikhailov, G. K. Ul'yanov, and A. K. Shebarskaya 918 263

Analyzer for High-Speed Processes – G. I. Gotlib, V. Ya. Zagurskii, and V. P. Novikov 918 264

Multichannel Commutator of Low-Level Signals – V. S. Grubnik, E. A. Lomtev, I. G. Perolainen, V. M. Tikhonov, and V. M. Shlyandin 919 265

Instrument for Measuring Nonlinearity of Sawtooth Voltage Pulses – V. A. Bondar', E. M. Kuznetsov, and V. A. Suvorov 920 265

Instrument for Measuring Small Phase Fluctuations in Traveling-Wave Tubes – B. A. Nikol'skii 921 266

Compact High-Power High-Frequency Oscillator – Yu. I. Drabovich, N. N. Yurchenko, P. N. Shevchenko, V. G. Grebenyuk, S. V. Salko, and Yu. A. Tverdokhleb 922 266

Programmed Pulse Generator for Excitation of Electrochemiluminescence – A. I. Bykh, A. V. Kukova, and V. M. Shipov 922 267

Calibrator for Inductometers – V. A. Markov, L. S. Oleinik, S. A. Skorodumov, and L. M. Tret'yakov 923 267

U4320/1 and U4320/2 Units for Measuring Magnetic Induction – T. P. Babintseva, I. V. Kotsyubinskii, V. A. Markov, S. A. Skorodumov, L. M. Tret'yakov, and E. A. Shulyakovskii 924 268

Cadmium Vapor Gas Laser LG-70 – M. K. Dyatlov and V. G. Kas'yan 925 268

Semiconducting Dosimeter for Ultraviolet Radiation – Yu. A. Gol'dberg, O. V. Konstantinov, V. M. Lapkin, T. V. L'vova, Yu. F. Romanov, and B. V. Tsarenkov 925 269

SK-2 Instrument to Resolve Complex Spectral Curves into Their Components – P. P. Aganov, S. V. Biryukov, A. S. Dzhus, L. A. Kozlovich, Yu. V. S[illegible]in, and Yu. N. Chirgadze 926 270

Miniature Elect[illegible]et Cooled by Liquid Nitrogen – V. R. Gakel' and A. S. Kost[illegible] 927 271

Volume 20, Number 4, Part 1 July-August, 1977

Mass-Spectrometric Methods and Devices Using Periodic Motion of Ions along Closed Trajectories (Review) – L. N. Linnik 929 7

Modulus-Forming Unit for Instantaneous Values of Alternating Voltage (Review) – Z. I. Dombrovskii and A. A. Stolyarov 937 14

TECHNOLOGY OF NUCLEAR RESEARCH

Diode Electron Accelerator with Large-Beam Cross Section – G. S. Kaz'min, N. N. Koval', Yu. E. Kreindel', V. S. Tolkachev, and P. M. Shchanin 942 19

Portable Electron Gun for Investigating and Adjusting Particle Detectors – S. V. Golovkin and A. M. Zaitsev 944 21

Project for a Linear Accelerator for an Experimental Neutron Generator – I. M. Kapchinskii 946 23

Wide-Band Mirror Optical Pathway for Electron-Ring Diagnostics Using Synchrotron Radiation – G. I. Belinskaya, A. S. Dubovik, Yu. T. Kiryushin, A. A. Mal'tsev, and B. M. Stepanov 950 27

	Engl./Russ.	
Diagnostic Hydrogen-Atom Injector – G. I. Dimov, G. V. Roslyakov, and V. Ya. Savkin	953	29
Highly Stable Secondary Emission Monitor of Current of a Beam of Accelerated Electrons – I. A. Prudnikov, G. L. Saksaganskii, E. B. Bazhanov, and B. V. Zabrodin	957	33
Experimental Determination of Resolution Function for Time-of-Flight Spectrometer – Yu. L. Shitikov, M. G. Zemlyanov, and S. P. Mironov	960	35
Automation of Parameter Measurement and Monitoring for Amplification–Conversion Tract of a Spectrometer Based on Semiconductor Mosaics – I. N. Sinogeev, M. N. Andronenko, and E. M. Orishchin	966	41
Superposition Recording Method for Neutron Crystal Spectrometer – V. P. Glazkov, V. A. Somenko, and Sh. Shil'shtein	969	43
Scintillation Hodoscope with Small FÉU-87 Photomultipliers – G. A. Saruev, N. A. Rybakova, N. K. Bulgakov, V. M. Kuznetsov, B. N. Kalinin, and V. V. Mameev	971	44
Separation of Electron-Photon Cascades with the Aid of a Scintillation Counter System – É. O. Agasyan, A. S. Aleksanyan, T. L. Asatiani, A. O. Gasparyan, V. A. Ivanov, G. K. Megrabyan, G. G. Mkrtchyan, and R. N. Pikhtelev	973	46
Measurement of Coordinate in Hodoscopic Spectrometer – S. V. Donskov, A. V. Inyakin, V. A. Kachanov, R. N. Krasnokutskii, A. A. Lednev, Yu. V. Mikhailov, Yu. D. Prokoshkin, E. A. Razuvaev, and R. S. Shuvaev	976	49
Instrument for Multiparametric Analysis of Kinematics of Fission-Fragment Scattering – M. N. Andronenko, L. N. Sinogeev, G. E. Solyakin, Yu. A. Chestnov, and V. E. Shashmin	978	51
Measuring System of Instrument for Multiparametric Analysis of Kinematics of Fission-Fragment Scattering – M. N. Andronenko, L. N. Sinogeev, G. E. Solyakin, Yu. A. Chestnov, and V. A. Shashmin	980	53
Feed Mechanism of System for Treatment of Recording from Large Bubble Chambers – L. S. Shiyanov	983	55
Multipulse High-Voltage Supply for Filmless Spark Chambers – P. I. Fillipov	988	60
Capacitor Chambers – L. A. Avchiev	991	63
Proportional Chamber with Analog Data Plotting – V. E. Popov and A. N. Prokof'ev	994	66
Plastic Scintillator of High Transparency Containing Gadolinium – V. I. Aleshin, A. M. Bakalyarov, A. Ya. Balysh, V. I. Lebedev, S. A. Malinovskaya, L. P. Vetrenko, and L. E. Pelepyagina	997	38
Efficiency of a Neutron Scintillation Detector at Energies to 220 MeV – P. I. Galumyan and R. Kh. Markaryan	999	70
Investigation of Dependence of Homogeneity of Light Collection in a Large Size Scintillation Counter on Kind of Reflector – R. G. Astvatsaturov, V. I. Ivanov, E. Knapik, V. A. Kramarenko, A. I. Malakhov, and M. N. Khachaturyan	1001	72
Light Output of CsI(Tl) Crystal Exposed to Protons with 3-15 MeV Energies – D. Dorchoman, M. Konstantin, D. Lazarovich, I. Muntyanu, K. O. Oganesyan, and S. Yu. Porokhovoi	1003	74
Study of Surface Barrier Detectors in a Xenon Ion Beam – V. F. Kushniruk and Yu. P. Kharitonov	1005	76
Monte Carlo Calculation of Sensitivity Function for Nonhydrogenous Liquid γ-Ray Detector – M. V. Savin, E. N. Donskoi, I. N. Paramonova, V. I. Roslov, and A. A. Sadovoi	1009	79
Method of Suppressing Single-Particle Background in Recording Electron–Photon Showers – B. S. Ishkhanov, Yu. V. Kuznetsov, E. V. Lazutin, I. M. Piskarev, V. A. Khrushchev, T. N. Levchenko, V. P. Popov, and Yu. G. Yakushina	1012	82
Operating Life of X-Ray Proportional Counters – A. A. Vaigachev, E. F. Klukvina, S. Yu. Puzyrev, L. S. Sorokin, V. G. Chaikovskii, and K. I. Shchekin	1014	84
APPLICATIONS OF COMPUTER ENGINEERING IN EXPERIMENTATION		
Two-Channel Data Gathering and Registration System for Fast-Action Experiments – A. N. Kasperovich, O. M. Mantush, and Yu. V. Shalaginov	1016	86

	Engl./Russ.	
Device for Multivariate Analysis of Discrete Information – V. M. Kuznetsov, V. V. Mameev, G. N. Petlin, and V. K. Tomchakov	1019	89
Calculation of Peak-Detection Probability for Line Spectra – I. M. Gopych, I. I. Zalyubovskii, G. Éler, and G. V. Vinel'	1021	90
Register Mechanism for a Semiautomatic Measuring Instrument for Reduction of Camera Photographs – B. N. Semenov	1024	93
Block for Coding and Reading Data from Hodoscopic Registration Systems in CAMAC Standard – S. G. Basiladze, V. A. Smirnov, and V. K. Yudin	1028	97
Format Converter with Parity Control Using a Ring Shift Register – I. E. Vasinyuk and A. S. Nanasyan	1035	105
Device for Recording Digital Voltmeter Readings on to Punched Tape – P. D. Batakovskii, V. A. Maksimovich, and G. M. Trostyanskii	1037	106
Instrument for Measuring Time Intervals to an Accuracy of 2 nsec – Yu. N. Artyukh, M. A. Arnit, G. I. Gotlib, and V. Ya. Zagurskii	1039	108
Digital-to-Analog Converter with Linear Interpolation – V. E. Yamnyi, É. I. Podol'nyi, V. V. Radkevich, Yu. I. Belonosov, and B. M. Borozdin	1041	110
ELECTRONICS AND RADIO ENGINEERING		
Information Readout Circuit for Magnetostriction Spark Cameras – S. G. Basiladze, Z. Guzik, and A. N. Parfenov	1044	112
Calculation of Missed Counts and Registration Efficiency of Electronic Systems for Drift Chambers – S. G. Basiladze and V. Tlachala	1047	114
High-Speed Voltage Sample and Hold Circuit – Yu. D. Belonosov, V. E. Yamnyi, and É. I. Podol'nyi	1051	118
Binary-to-Binary Coded Decimal Code Converter – M. Sh. Guseinov, I. M. Amiraslanov, and A. M. Amirov	1053	120
Integrated Circuit Analog Switch – I. K. Krylov and V. N. Kuleshov	1055	122
Photon Count Circuit Using 521SA2 High Speed Comparator – R. V. Orlov, U. V. Yanson, and Ya. Y. Veinald	1056	123
Monitoring Unit for Time-Interval Analyzers of Nanosecond Range – A. I. Klimov and E. A. Meleshko	1058	125
Random Process Normalizer with Respect to Dispersion Having Large Dynamic Range – A. S. Ageev, L. I. Volkov, and V. V. Motov	1061	127
Use of Noise-Normalization to Measure Low Q – E. V. Aleksenko and G. I. Filippov	1063	129
Universal Charge-Sensitive Preamplifier – V. I. Dukhanov, I. B. Mazurov, A. A. Mitin, and A. A. Chesalov	1065	131
Linear Spectrometer Amplifier – O. V. Ignat'ev and N. F. Shkola	1068	133
Electrometer Amplifier – A. A. Antonovskii and V. N. Blinov	1071	137
Phase-Stable Amplifier-Limiter – A. M. Fishtein	1074	139
Amplifier with Time-Dependence Gain – S. Li and R. G. Faizullin	1076	141

Volume 20, Number 4, Part 2 July-August, 1977

ELECTRONICS AND RADIO ENGINEERING		
Economical Low-Frequency Amplifying Arrangements – Ya. T. Zagorskii and A. A. Kuznetsov	1079	143
High-Q Selective RC Amplifier – G. S. Ostapenko and A. G. Ostapenko	1083	147
Synchronous Filter – A. V. Kaptsov, V. A. Zakharov and V. V. Ivanov	1085	149
Sawtooth Voltage Generator with Symmetric Output Relative to the Zero Level – V. M. Katsman	1087	150
Stepped Sawtooth Waveform Generator Using Microcircuits – L. F. Berzin and A. L. Yakimakha	1089	152
Multivibrator with Increased Thermal Stability – V. P. Budyanov, A. I. Krivonosov, and A. V. Klopotskii	1091	154

	Engl.	Russ.
Ultralow-Frequency Blocking Oscillator Using MOS Transistors — L. F. Berzin and A. L. Yakimakha	1092	155
Infralow-Frequency Free-Running Phantastron Using MOS-FETs — L. F. Berzin and A. L. Yakimakha	1095	157
High-Power Long-Pulse Thyratron Modulator with Small Off-Duty Factor — G. G. Gontarev	1097	159
Generator of High-Power Pulses of Sawtooth Voltage — V. A. Ivanov, V. A. Sinyavskii, A. N. Smirnov, and V. G. Chumakov	1099	161
Arc Gap with Magnetic-Field Arc Displacement — S. P. Bugaev, V. I. Koshelev, A. F. Medvedev, and M. M. Nikitin	1100	162
High-Voltage Heavy-Current Arc Gap — G. S. Villeval'd, V. N. Karasyuk, and G. I. Sil'vestrov	1103	164
High-Voltage Mega-Ampere Cable Transformer — G. S. Villeval'd, V. N. Krasyuk, and G. I. Sil'vestrov	1105	166
Nanosecond Current Pulse Former — M. G. Nikiforov	1107	168
Nanosecond Pulse Former — V. V. Korotkevich, I. Z. Rutkovskii, and N. N. Shabel'	1109	171
Pulse Shaper for Scintillation and Cerenkov Counters — I. V. Glavanakov, V. N. Stibunov, and N. P. Fedorov	1111	172
Clock-Pulse Shaper and Matching Circuits for Series 186 and 190 Microcircuits with Transistor—Transistor Logic Microcircuits — A. A. Urazov and A. V. Alekseev	1114	175
High-Frequency Generator Based on Two Avalanche Diodes — D. P. Burtovoi, G. G. Kanarik, A. I. Tereshchenko, and N. Z. Chumakov	1116	177
Measurement of Delay in Coaxial Cables — D. K. Ryazanov	1118	179
Bipolar Analog-to-Digital Converter — S. S. Katushonok, M. V. Komar, and A. G. Larichkin	1120	180
High-Pressure Chamber for Nuclear Quadrupole Measurements on ISSh-1 Spectrometer — V. L. Serebrennikov and A. K. Moskalev	1122	183
Frequency Multiplier with a Variable Multiplication Factor — A. Z. Venger, A. N. Ermak, and A. M. Yakimenko	1125	185
Instrument for Measuring Small Active Resistances and Inductances over Range 0.1-50 kHz — M. S. Kosilov, V. P. Ovsyankin, V. T. Grechnev, and V. V. Sinitsyn	1127	187
Oscilloscope for Displaying Curves in Polar Coordinates — V. P. D'yakonov, A. G. Kalinenko, A. A. Maksimchuk, V. S. Podoprigorov, A. M. Remnev, and O. V. Rudnev	1129	189
Means of Transformerless Voltage Conversion and Construction of Transformerless Secondary Power Sources — L. M. Braslavskii, A. M. Sazhnev, and V. G. Kobylyanskii	1132	192
GENERAL EXPERIMENTAL TECHNOLOGY		
Automated Instrument for Studying Differential Scattering of Fast Beams — B. V. Zubkov, A. P. Kalinin, and V. B. Leonas	1141	201
Ion Source Based on a Discharge Contracted in Crossed Fields — B. I. Zhuravlev, V. A. Nikitinskii and A. S. Zakharov	1144	204
Controlled Gas Discharge Switch with a Cold Cathode — G. I. Nosov and S. A. Smirnov	1147	206
Microwave Interferometer for Plasma Diagonostics with Fourfold Passage of Signal through Plasma — V. A. Shcherbov	1149	208
Beam Splitter with 90° Phase Shift for Interference Displacement Measuring Instrument — V. G. Vyskub, Yu. N. Isaev, V. L. Mamaev, L. A. Markova, B. S. Rozov, and P. I. Savostin	1151	210
Time Characteristics of FÉU-62 and FÉU-28 Photomultipliers — S. S. Betokhin, V. I. Karas', V. M. Lomako, and I. V. Reznikov	1153	212

Mass-Spectrometric Installation for Analysis of Gaseous Products of Breakdown of Polymers by a High-Frequency Plasma – I. A. Tikhomirov, G. S. Tikhonov, and V. A. Klimenov 1154 213
Attachment Containing Electrostatic Analyzer for Mass Spectrometers of a Single Series – V. P. Ivanov, A. A. Sysoev, and G. A. Samsonov 1156 215
Cavity Type Pulse Light Source for Photolysis – G. I. Belogolovtsev and N. N. Lyannoi 1158 217
Pulsed Controlled Source of Vacuum Ultraviolet with Line Spectrum – V. N. Rubtsov, A. L. Galuza, A. P. Kirichenko, and V. A. Konstantinov 1161 220
Radiation Source Based on an Optical Discharge in Xenon – G. L. Kabanov, V. A. Nikolaev, A. I. Pavlov, and I. N. Slivkov 1163 222
Method of Recording Profiles of Spectral Lines with High Time Resolution – Yu. I. Chutov and V. A. Zhovtyanskii 1166 225
Unit to Record Kinetic Curves on Spectrophotometers SF-10 and SF-14 – R. M. Basaev, K. A. Chernyakovskaya, and F. P. Chernyakovskii 1168 227
Use of Diffraction Gratings to Adjust Holographic Matched Filtration Systems – O. G. Kartashov, L. F. Kupchenko, and T. G. Lishchina 1169 228
Measurement of Luminance Contrast of High-Power Laser – S. T. Durmanov and L. N. Plyashkevich 1171 230
Simple Method of Measuring Fluctuations in Diameter of a Laser Beam – M. I. Lobachev, É. M. Rabinovich, and V. V. Tuchin 1174 233
Laser Radiation Modulator Based on a Diffraction Grating – B. M. Brzhozovskii, V. V. Bondarev, and A. A. Ignat'ev 1177 235
Reducing Contrast Sensitivity of Vidicons for Short Pulse Exposures – A. V. Petrakov 1179 236
Thermostabilized Optical Head of an Infrared Radiometer – G. A. Gumenyuk, N. I. Sivkov, and A. V. Shitik 1181 238
Measuring the Kerr Constant of Conducting Liquids – V. A. Zamkov 1182 239
Apparatus for Determining Scattering Coefficient of Light in a Liquid by an Absolute Method – N. B. Rozhdestvenskaya, E. N. Gorbacheva, and A. N. Ryabinin 1184 241
Effect of Shape and Material of Pole Pieces on Field Uniformity in Magnets – V. L. Vengrinovich, A. A. Lukhvich, S. A. Novikov, and A. A. Savitskii 1187 243
High-Pressure Calibration in Chambers Using Shift of the Ruby R_1-Luminescence Line in Temperature Range 80-550°K – M. F. Shchanov and S. I. Subbotin 1190 246
Vacuum Piezoceramic Transducer for Measuring Pressure in the 760-10^{-5} torr Range – V. A. Beseda, V. G. Cherkasov, V. V. Gulyaev, and V. N. Savoiskii 1193 249
Diffraction Method of Determining Thickness of Ferromagnetic Films in an Electron Microscope – Ya. M. Pogosyan and D. Pétsol'd 1195 251
Determination of Effective Annealing Time by Using an Analog Computer – A. V. Baldin, A. E. Buzynov, V. S. Luparev, A. F. Matvienko, and A. M. Ryabinkin 1197 253

LABORATORY TECHNIQUES

Electrooptical Method of Measuring High-Frequency High Voltages – V. A. Zaporozhchenko and A. V. Kachinskii 1200 255
Small-Sized Radio-Frequency Superconducting Tuned Circuit – L. L. Anan'ev, E. P. Krasnoperov, A. M. Pozharov, and V. L. Rubinov 1202 257
Method of Applying Strong Electric Fields in ESR at Low Temperatures – R. Sh. Usmanov 1204 258
Small Flow-Through Cryostat for Polarization Microscope – V. I. Silaev, A. I. Belyaeva, and Yu. N. Stel'makhov 1206 260
Registration of Absorption Spectra of Fused Salts with an SFD-2 Spectrophotometer – M. V. Smirnov, A. V. Loshagin, and A. P. Khaimenov 1208 262

	Engl.	Russ.
Thermocouple Lead Ins for High-Pressure Chamber Operating with Strongly Compressible Media – A. P. Novikov and I. G. Yurchenko	1209	263
Universal Chamber for Measurement of X-Ray and Electric Characteristics of High-Resistance Semiconducting Layers – V. A. Izvozchikov, V. V. Laptev, and Yu. Kh. Palanduzyan	1211	264
Comparator for Measurements of X-Ray Photographs and Other Objects – K. V. Varli, N. P. D'yakonova, and A. M. Rutman	1214	267
Test Object for a Raster Electron Microscope – A. S. Oleinik and L. N. Mal'ko	1215	269
Cryogenic Flange Joint – V. F. Solyanko, T. P. Boiko, and K. A. Kudryavtseva	1216	270
Indirectly Heated Thermoresistor Based on Silicon Whisker Crystals – V. S. Postnikov, S. A. Ammer, O. S. Eliseeva, and L. A. Andryukhina	1218	271
NEW INSTRUMENTS		
Automatized Installation for Neutron-Activation Analysis – I. M. Pronman, E. I. Antonov, and A. M. Kazantsev	1221	274
Programmed Temperature Regulator RTP-3M – A. L. Aleksandrov, E. M. Bazarnyi, V. M. Brylov, and L. Z. Pososhenko	1221	275
Automatic Temperature Indicator – Yu. A. Lyunovskii-Gurov and R. N. Yudin	1222	276
LAF-160 Nitrogen Forevacuum Trap – V. G. Martynenko, V. A. Kovalenko, V. L. Pershin, S. F. Grishin, and V. Ya. Chernyshenko	1223	277
Membrane Compressor – M. D. Bondarenko and A. M. Bandur	1223	278
Kit of Instruments for Statistical Research – A. V. Blokhin, M. I. Kolodin, Yu. I. Rebrin, and V. A. Romanov	1224	278
Lightning Analyzer – V. I. Potapkin, A. A. Dul'zon, and R. N. Makarov	1224	279
Digital Pulse-Height Analyzer for Complex Functions – V. I. Pirushkin, A. V. Pisarskii, and A. N. Smirnov	1225	279
Bandwidth Output Amplifier for High-Speed Oscilloscope – L. M. Pakhomov	1225	280
Broadband Pulse Amplifier with 300-Watt Output Power – L. M. Pakhomov	1226	280
Phase-Setting Apparatus Outfit for 20-Hz to 1-GHz Range – N. S. Zhilin, A. N. Voronkov, V. V. Grishaev, A. V. Nikonov, Yu. K. Sidorov, S. Kh. Simon, L. S. Subbotin, and V. E. Érastov	1226	281
High-Frequency Phasemeter – V. V. Grishaev, N. S. Zhilin, S. Kh. Simon, L. S. Subbotin	1227	281
ShCh1516 Integrating High-Speed Digital Voltmeter – N. V. Kibireva	1227	282
F7079 Contactless Indicator of Electric Voltages – L. P. Gosteva, V. G. Kokovikhin, A. A. Kotunov, K. P. Mal'chenko, A. T. Smolin, N. F. Felisova, and N. I. Yakovlev	1228	283
ÉPR Spectrometer in 2-mm Range for Chemical Research – A. A. Galkin, O. Ya. Grinberg, A. A. Dubinskii, N. N. Kabdin, V. N. Krymov, V. I. Kurochkin, Ya. S. Lebedev, L. F. Oranskii, and V. F. Shuvalov	1229	284
VUM-10 Multipurpose Vacuum Installation – K. K. Bobro, B. V. Borts, G. N. Gutnik, S. F. Kravchenko, B. I. Lagutin, V. P. Selivanov, and S. Ya. Chekanov	1230	285
Helium Condensation Forevacuum Pump – S. F. Grishin, V. A. Kovalenko, E. Ya. Grishina, A. N. Kirnos, V. Ya. Chernyshenko	1231	286
Small Gadolinium Ion-Getter Pump – V. G. Barnakova, A. G. Grushnikov, A. S. Nazarov, and M. V. Silaev	1232	287

Volume 20, Number 5, Part 1 September-October, 1977

Sixty Years of Soviet Physics	1233	5
RATAN-600, New Radio Telescope of the Academy of Sciences – A. B. Berlin, N. A. Esepkina, Yu. K. Zverev, N. L. Kaidanovskii, D. V. Korol'kov, A. I. Kopylov, É. I. Korkin, Yu. N. Pariiskii, N. R. Ryzhikov, N. S. Soboleva, A. A. Stotskii, and O. N. Shivris	1235	8

Engl./Russ.

IBR-2 Periodic Pulse Reactor for Neutron Research – V. D. Anan'ev, D. I. Blokhintsev, Yu. M. Bulkin, B. N. Bunin, E. D. Vorob'ev, N. A. Dollezhal', V. I. Lushchikov, Yu. M. Ostanevich, V. S. Smirnov, I. M. Frank, N. A. Khryastov, E. P. Shabalin, É. I. Sharapov, and Yu. S. Yazvitskii . . . 1245 17

NUCLEAR EXPERIMENTAL TECHNIQUES

Small 600-keV Nanosecond Electron Accelerator – N. V. Belkin, V. V. Kul'gavchuk, N. G. Pavlovskaya, M. Yu. Tarakanov, V. A. Tsukerman, and S. L. Él'yash . . . 1266 36

High-Current Pulsed Electron Accelerator for Stimulation of Compressed Gases – A. N. Bastrikov, B. M. Koval'chuk, N. G. Kolganov, I. N. Konovalov, and Yu. A. Kotov . . . 1268 38

Shaping Short Bunches of H^- Ions at Entrance of Linear Accelerator – S. A. Lukshin, V. P. Tkach, and A. P. Fedotov . . . 1271 40

Magnetically Hard Quadrupole Lenses for Drift Tubes of Ion Linear Accelerators – I. M. Kapchinskii, A. M. Kozodaev, N. V. Lazarev, and V. S. Skachkov . . . 1273 42

Computer Prediction and Diagnosis of Failures of Systems in Electron Linear Accelerator – V. N. Boriskin and I. A. Grishaev . . . 1277 45

Measurement of Ion Drift Time in the Gap of an Electrostatic Accelerator – V. P. Yakushev, V. A. Nikitin, V. A. Romanov, K. A. Rezvykh, and V. I. Spirin . . . 1280 48

Apparatus for e–γ Delayed Coincidences Based on a Magnetic Lens Spectrometer and a Ge(Li) Detector – B. A. Alikov, Ya. Vavryshchuk, G. I. Lizurei, M. M. Malikov, T. M. Muminov, V. I. Stegailov, and R. R. Usmanov . . . 1282 49

Two-Arm Spectrometric Arrangement for Studying (γ, pπ^-) Reaction on Nuclei – P. S. Anan'in, I. V. Glavanakov, M. N. Gushtan, A. P. Kashirin, and V. N. Stibunov . . . 1284 51

Preparation of Events Measured on HPD for Geometric Reconstruction – F. Kotorobai, B. I. Moroz, and A. I. Rodionov . . . 1287 54

Apparatus for Measurement of High Nuclear Polarization of Targets – Yu. F. Kiselev and V. N. Matafonov . . . 1289 55

Microchemical Analysis of Thin Films by Elastic Scattering of ^3He – Yu. Bukh, N. I. Balalykin, G. M. Osetinskii, and Wang Seng Ch'ang . . . 1295 60

Elemental Analysis of Biological Specimens by Proton Excitation of Characteristic X-Ray Emission – A. N. Dedik, A. P. Klyucharev, N. F. Severin, A. G. Strashinskii, N. V. Serykh, N. A. Skakun, G. K. Khomyakov, and A. I. Chumachenko . . . 1299 64

Two-Gap Spark Chamber with an Area of 6 m^2 – Yu. E. Zvonkov, K. A. Kotel'nikov, and S. B. Shaulov . . . 1301 66

Study of Optical Gas-Discharge Chambers in the Mode of Pulsed Proportional Amplification – A. G. Lavkin, E. A. Monich, V. I. Rykalin, and V. K. Semenov . . . 1304 68

Sectional Flow Proportional Counter for Mössbauer Spectroscopy – L. A. Korytko, F. G. Kulidzhanov, N. S. Medvedeva, V. N. Somov, and A. N. Tolstikov . . . 1306 70

Time Parameters of Commercial Ge(Li) Detectors – A. I. Popov, V. E. Storizhko, V. D. Zabolotnyi, I. K. Tarasov, and Yu. P. Antuf'ev . . . 1310 72

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING

Focal Managment of CAMAC Modules from a TPA-1001/i Computer – A. Kh. Angelov and L. V. Dubovik . . . 1313 75

Pulse-Data Input Unit for a Nairi-2 Computer – Yu. V. Inyutin and V. I. Poltinnikov . . . 1315 77

Adjustable Multifunctional Pulse Distributor – V. I. Afanas'ev, V. D. Pysin, and B. D. Brykanov . . . 1317 78

		Engl./Russ.
Automatic Pulse-Train Counter and Recorder – S. G. Kornilova, N. S. Zaretskii, and V. I. Gubanov	1319	80
ELECTRONICS AND RADIO ENGINEERING		
On the System of Parameters of Modular Coincidence Circuits – S. G. Basiladze	1322	83
Counter with a Time Window – A. M. Kalashnikov and A. K. Sheremet'ev	1326	86
Counters with Controlled Scaling Factor – V. N. Kostyukov and P. O. Reger	1329	89
Universal Discriminator with Exact Time Clamping – B. Yu. Baldin, Z. V. Krumshtein, and A. I. Ronzhin	1331	91
Threshold Device with Compensation for Variations in Background and Video Signal – L. I. Skorobogat and V. G. Lyutsau	1335	94
Switching Devices Based on Λ Transistors – V. O. D'yakonov and O. V. Semenova	1337	96
Time-Delay Devices Based on Monolithic Integrated Comparators – V. P. D'yakonov and A. M. Remnev	1340	99
Delay Device for Analog Signals – A. G. Kan, Z. P. Karashetskii, and A. G. Nikitin	1344	102
Overload Protection for Electrical Systems – V. G. Glushchenko, I. A. Kurskov, and R. S. Semina	1346	103
Control Devices for Digital Indicating Lamps – Ya. V. Buchinskii and A. A. Stolyarov	1349	105
Variable-Orientation Marker Generator – V. S. Govorov	1351	107
Square-Pulse Shapers Based on Monolithic Integrated Comparators – V. P. D'yakonov and A. M. Remnev	1355	110
Pulse Shapers for Multichannel Electronic Equipment – S. G. Basiladze and V. K. Yudin	1359	113
Megavolt Water-Filled Trigatron-Type Spark Gaps – V. Ya. Ushakov	1364	118
Controlling Charging of a Capacitive Storage Element – O. B. Danilov and A. P. Kraev	1368	121
Electrical Circuit for Recording Negative Conductivity on Volt–Ampere Characteristics of High-Current Plasma Tubes – A. L. Barannikov, P. Yu. Pekshev, B. K. Feoktistov, and V. K. Chernyshev	1370	123

Volume 20, Number 5, Part 2 September-October, 1977

ELECTRONICS AND RADIO ENGINEERING		
Unipolar Current-Pulse Generator – G. A. Ivanov, V. A. Bulanov, and L. V. Svetov	1373	125
Avalanche-Transistor Pulse Generator with Reduced Supply Voltage – V. P. D'yakonov and A. A. Sterlyagov	1375	126
Amplifier with Controlled Amplification Coefficient – Yu. I. Belonosov and V. E. Yamnyi	1377	127
dc Amplifier–Comparator with Galvanic Decoupling of Inputs and Output – N. M. Zolotova	1379	129
Retunable High-Frequency Band Filters Composed of Standard Elements – L. M. Kenin and G. M. Kurasova	1382	132
Astatic Frequency Multiplier with a Wide Pull-in Range – A. P. Bondarev, V. N. Radchenko, and V. V. Abramov	1386	135
Frequency Multiplier with a Phase Synchronization Circuit – R. M. Trakhtenberg, B. A. Staroverov, and V. P. Galas	1389	138
Resonant Microwave Device with Amplitude-Frequency Characteristic Tunable over a Wide Range – V. D. Bobryshev, V. M. Dmitriev, and N. N. Prentslau	1391	140
Variable Attenuator for High Microwave Power Levels – N. D. Zhivotov and A. E. Tolstoi	1394	142
Microwave Power Divider – E. T. Protasevich	1396	143

	Engl.	Russ.
Radiometer for the 1.35-cm Range with an Orthomode Type of Mixer – M. N. Kaidanovskii, Yu. A. Nemlikher, A. A. Stotskii, and I. A. Strukov	1398	145
Null Line Stabilizer for a Nuclear Magnetic Resonance Spectrometer with Time Division – V. A. Zabrodin, K. A. Tikhonov, and A. S. Mel'nikov	1401	147
Improving Accuracy of Pulse Magnetometer Measurements – V. M. Lachinov and V. K. Makoveev	1403	149
Switching Power Supplies – E. N. Panasyuk, E. R. Kosyi, and B. A. Pavlov	1407	153
High-Voltage Transformerless dc Stabilizer – M. B. Leitman and V. V. Kruglov	1409	154
dc Current Regulator – G. L. Benediktov and N. M. Novikova	1410	155
Logic-Signal Controlled Thyristor ac Switch – N. N. Belous	1412	157
GENERAL EXPERIMENTAL TECHNIQUES		
Quadrupole Mass Spectrometer for Recording Beams of Light Atomic Particles – B. V. Zubkov and E. N. Evlanov	1413	158
Device with Image Convertor for Low-Temperature Plasma Diagnosis by Scattering Method – L. N. Pyatnitskii, V. S. Zhivopistsev, and V. V. Korobkin	1416	160
Parameters of FÉU-118 Photomultiplier in Spectrometric Mode – O. P. Sobornov	1419	162
Influence of Temperature on Noise and Amplitude Distribution of Dissector Output Pulses – S. S. Vetokhin and I. V. Reznikov	1422	165
Two-Channel Ultraviolet Photometer – M. Ya. Barkan and V. N. Karalis	1424	166
Device for Recording Differential Optical Spectra – A. Kh. Rozhko, V. V. Sergienko, and A. G. Chmul'	1427	169
Improving Illumination System of IKS-12 Infrared Spectrophotometer – I. V. Krutetskii and A. B. Fedortsov	1429	171
Single-Stage CO_2 Laser for Producing Pulses of Radiation with Power of Tens of Gigawatts – I. A. Berezhnoi, V. A. Boiko, V. A. Danilychev, V. D. Zvorykin, V. V. Ignat'ev, I. V. Kholin, and A. Yu. Chugunov	1431	172
Powerful Laser with Film Q-Switch – V. A. Parfenov, L. N. Pakhomov, V. Yu. Petrun'kin, and V. A. Podlevskii	1434	174
Combined Use of Two-Beam and Holographic Interferometers for Measuring Small Inhomogeneous Strains – V. M. Varikash and A. K. Polonin	1436	176
Magnetic Systems for Suspending Diamagnetic Bodies Freely – V. M. Ponizovskii	1439	178
Optimizing Superconducting Helmholtz Coils Taking into Account Dependence of Critical Current on Induction – D. Kabát and L. Cesnak	1442	180
Measuring Energy Losses in Superconducting Magnets – V. G. Dubasov, V. V. Mymrikov, G. E. Sereda, and G. V. Trokhachev	1445	182
Apparatus for Measuring Internal Friction of Thin Films in the Process of Plastic Deformation in the Temperature Range 4.2-300°K – V. S. Postnikov, I. A. Safonov, I. V. Zolotukhin, and V. E. Miloshenko	1448	184
Measurement of Small Variations in Complex Elasticity of Crystals – S. I. Chizhikov, N. G. Sorokin, and V. S. Petrakov	1451	187
Hydrostatic Liquids for Observation of NMR of ^1H at High Pressures and Low Temperatures – B. V. Pestryakov	1454	189
Measurement of Electrical Microfields in Scanning Electron Microscope – V. P. Ivannikov, A. E. Luk'yanov, V. P. Novozhilov, and G. V. Spivak	1456	191
Deflection System for Adjustment and Scanning of Electron Beams – Yu. L. Rybakov and B. N. Vasichev	1459	193
dc Voltage Instability Meter – A. G. Klyuikov	1463	197
Arrangement for Study of Polarization Effects in Photoconductivity – É. É. Godik, V. I. Dosov, O. V. Lamykin, and V. P. Sinis	1465	199
LABORATORY TECHNIQUES		
Differential Calorimeter for Electron Radiation – R. Ya. Strakovskaya, A. G. Stas', L. M. Kovalenko, and L. A. Lukashevich	1467	201
High-Temperature Optical Cuvette – S. P. Borodai, A. K. Mal'tseva, L. V. Nozik, A. G. Romashin, G. A. Smirnov, and G. V. Tkachenko	1470	203

	Engl.	Russ.
Television Recording of Interference Images – N. N. Bogdanov, O. I. Yagodkina, and T. M. Tarasova	1472	205
Relationship between Intensity of Hg 253.7-nm Line and Temperature of Lamp-Type DRT-220 – M. Ya. Barkan, V. N. Karalis, and V. P. Kachalov	1474	206
Continuously Acting Luminous Composition for Photoelectric Measurements – O. P. Pyl'skaya	1476	207
Cuvette for Studying Optical Nonuniformities in Aggressive Liquids – P. N. Lavrenko, O. V. Okatova, and K. S. Khokhlov	1477	208
Pressure Sensors Based on Variable-Gap $Al_xGa_{1-x}As$ – Z. N. Bartashevich, A. A. Kavalyauskas, and E. A. Shimulite	1479	210
Temperature Coefficient of Resistance of Pressure Sensors Made from Variable-Gap $Al_xGa_{1-x}As$ – Z. N. Bartashevich and E. A. Shimulite	1482	212
Strain Resistors Based on Silicon Whiskers – A. I. Drozhzhin and N. K. Sedykh	1485	214
Low-Temperature Sensors of Temperature and Deformation – A. I. Drozhzhin, A. A. Shchetinin, N. K. Sedykh, E. P. Novokreshchenova, and A. I. Dunaev	1488	216
Magnetostriction Force Transducer – V. A. Belyaev, O. I. Mizhiritskii, and V. F. Shishmintsev	1491	219
Miniature Heater – F. B. Bizhanov, D. V. Sokol'skii, and Sh. A. Abubakirov	1493	220
Low-Inertia Reverberatory Furnace – O. B. Danilov and A. G. Ravdin	1494	221
Viscosimeter for Measuring Three Coefficients of Viscosity of Liquid Crystals – V. A. Tsvetkov and G. A. Beresnev	1497	223
Apparatus for Growing Low-Temperature Single Crystals – S. A. Kozlov	1500	226
Apparatus for Transfer and Deformation of Cryogenic Crystals – A. É. Lykhmus	1502	227
Floating Level Gauge for Liquid Helium – G. P. Shemonaev, V. I. Makhan'kov, and I. S. Sidorenko	1504	229
NEW INSTRUMENTS		
UD-22UM Ultrasonic Pulse Apparatus – A. D. Gol'den, M. B. Burd, and M. V. Gershberg	1506	230
LOS-3 Miniature Broadband Organic-Compound Solution Laser – G. A. Abakumov, Yu. G. Basov, G. I. Kromskii, A. P. Kuzyaev, V. I. Pchelkin, A. F. Sil'nitskii, A. P. Simonov, V. V. Fadeev, and Yu. A. Yanait	1507	231
Television Analyzer of Laser Radiation – N. I. Mishchenko, S. M. Slobodyan, V. I. Bukatyi, and D. P. Chaporov	1508	232
Spectrometer System for Investigating Polarization Dynamics of Light in the Nanosecond Band – M. I. Demchuk, V. N. Vishnevskii, S. M. Dmitriev, and A. F. Chernyavskii	1509	232
Instrument for Investigating Weak Light Fluxes with Slowly Varying Intensity – M. I. Demchuk and V. N. Vishnevskii	1510	233
Industrial Electron Diffraction Camera Type ÉMR-100 – A. G. Alekseev, L. G. Boyandina, V. N. Vertsner, T. A. Verkhovskaya, G. D. Kisel', and O. P. Ovchinnikov	1511	234
Control Desk Type PIK-73M for Controlling High-Speed Cine Cameras – N. A. Konovalov and N. I. Lakhno	1512	235
Meter for Measuring Speeds of Ultrasonic Flow – V. T. Goloborod'ko, V. M. Zhiravov, Yu. M. Kiselev, and E. S. Shul'man	1513	235
Twenty-Turn Dial – I. V. Naumov	1514	236
Threestage Microcooler – V. A. Naer, L. A. Belozerova, V. S. Spivak, and I. Ya. Khirich	1515	236
Thermoelectric Coolers for Micromodules – L. I. Anatychuk, A. P. Mel'nik, and D. D. Nikirsa	1516	237
Pulse Generator for a Nuclear Magnetic Resonance Spectrometer – A. F. Babkin, A. V. Rusanov, and Yu. I. Dmitriev	1516	237
Type MIIS-1 Automated Multichannel Data and Measuring System – G. I. Batsyavichyus, R. V. Marchyulionene, T. P. Vasilyauskas, G. V. Miroshnikov, Yu. V. Karabak, and A. G. Isaev	1517	238
Miniature Laser Pulse Radiator Based on Semiconductor Quantum Generators with Electronic Excitations – Yu. A. Akimov, A. A. Burov, B. I. Kobetskii,		

	Engl./Russ.	
and M. V. Korchagin	1518	239
